Background

In 2019, LMPS commissioned the development of a master plan for the future restoration and preservation of Manor Park and Fountain Square, to provide a cohesive and consistent guide for future projects.

The project will involve pathway rehabilitation, relocation of the bicycle parking area and native plant restoration to promote resiliency from increasingly severe weather events.

Scape Landscape Architecture developed the master plan, F. Capparelli Landscape Design was selected to develop mechanical drawings and won a competitive bidding process to execute the work. Plans were put on hold in early 2020 due to the Covid 19 pandemic.

Implementation

Project implementation is scheduled to begin on January 25th. Segments of the pathway system will be closed in phases during the project.

PLEASE FOLLOW DETOUR SIGNS WHILE WE MAKE THESE IMPROVEMENTS
Phased Work Plan
Sample Materials
Trees and Shrubs - Understory

- Native, salt tolerant species appropriate for specific locations

Myrica Pensylvanica
American Holly
Gro-Low fragrat sumac
Allegheny servicevery
Ninebark
Ilex crenata steeds
Sample Materials
Perennials - Seawall and Rain Garden

Native, salt tolerant species appropriate for specific locations

- Seaside Goldenrod
- Butterfley Milkweed
- Cape Breeze Switch Grass
- New York Aster
Sample Materials
Woodland - Shade Perennials

- Native, salt tolerant species appropriate for specific locations

Ostrich fern
Carex Pensylvanica
Manor Park Sample Plan - Umbrella Point

HIGHLIGHTS:
- Expand salt tolerant plantings along seawall
- Renovate & restore existing native meadow –
- Add rain garden at low point
